

# Land Management Solutions.

ENKON's flagship product, **EnviroLIS**, is a web-based information management tool which has evolved over the past seven years. It has a wealth of features to track and accelerate your business processes related to **Land and Property Management**, including:

- **Land management forms** that manage key details about properties, facilities and land assets.
- **Standard reports** and a powerful **Report Editor** to query data stored within the forms for real-time reports.
- **Multimedia Management** to organise photos and documents.
- **Calendars** and **e-mail reminders** to help manage renewal dates, key payment dates, etc.
- **Contacts Database** to manage all types of contacts such as vendors, lessees, agencies, etc.

- **Navigation** system with powerful searching tools to locate information quickly.
- **Security System** that controls access to records within the system, individual pieces of data and to the functionality of the system for individual and groups of users.

**EnviroLIS** has a number of **Land and Property Management** modules that are designed to address the various business needs and management in your organization including:

- Facility Management
- Property Management
- Divestments and Acquisitions
- Tax Management
- Agreements and Leases
- Licences, Permits and Royalties
- Reserve Calculation
- Property Mapping

ENKON can offer a **Land Management Solution** for purchase or on a subscription basis. Through a subscription model, ENKON provides round-the-clock supervision of its system in a secure, state-of-the-art Data Centre without any of the overheads associated with internal system deployment and minimum impact on your own IT support staff.
