

Case Study

EAST KENTUCKY POWER CO-OP

Impressed with the flexibility of the Integral platform, ENKON was selected by East Kentucky Power Cooperative to build and deploy a feature-rich, enterprise-wide Land Rights Management (LRM) software solution.

About EKPC

More than 530,000 homes and businesses in 87 Kentucky counties depend on East Kentucky Power Cooperative and its 16 owner-member cooperatives for safe, reliable, affordable electric power.

The Objectives

- Provide land rights workflow
- Manage Right-of-Way activities and documentation
- Generate GIS-enabled reports
- File field reports on the fly
- Customizable fields and reports

Decrease Service Delivery Time

Integral improves efficiency by dramatically reducing processing time.

Powerful Reporting

Accurate metrics allow your organization to measure departmental efficiencies and improve service delivery.

Superior Data Integrity

Reduction of data redundancy, increased accuracy and prevention of data loss.

The Work

ENKON worked closely with East Kentucky Power Cooperative (“EKPC”) to provide an enterprise-wide Land Rights Management software solution to systematically manage right-of-way activities and information, including negotiation details, approvals, and legal proceedings, along with right-of-way document management.

The Results

The solution ENKON provided to EKPC included the migration of existing data from EKPC’s Microsoft Access database which contained legacy land rights data such as property owner information, scanned deeds, easements, and restrictions. The Land Rights Management solution integrates with EKPC’s Document Central (Oracle’s WCC/UCM), a corporate document repository which hosts acquisition notes, deeds, easements, and land rights agreements. ENKON also integrated with EKPC’s ESRI GIS system to help provide robust reporting, including out-of-the-box reports and custom user-built reports.

The versatility of the Integral platform allowed ENKON to provide EKPC with the ability to add spatial information/layers and submit notes and photos from the “field” in real time while online, or in “disconnect” mode that syncs the application when connectivity is restored. The feature-rich ENKON Land Rights Management solution also allows for the documenting of conversations with property owners and uploading multiple easements and deeds, all while offering granular levels of security based on roles with various read/write authorizations.
