

Case Study

LAFARGE CORPORATION

ENKON was initially retained in 2003 to build and host a web-based Land Information System for Lafarge's properties and facilities across North America.

About Lafarge LIS

The Lafarge LIS, built using ENKON's Integral platform, was expanded in 2007 to include additional land management processes, such as tracking acquisitions, divestments, and agreements that relate to land holdings.

The Objectives

- Track acquisitions, divestments, agreements, leases, easements, and contracts
- Manage data related to facilities, property registries, and titles
- Reports for Regulatory Compliance, Task Tracking, Plans, Local Affairs

Decrease Service Delivery Time

Integral improves efficiency by dramatically reducing processing time.

Powerful Reporting

Accurate metrics allow your organization to measure departmental efficiencies and improve service delivery.

Superior Data Integrity

Reduction of data redundancy, increased accuracy and prevention of data loss.

The Work

ENKON delivered a feature-rich Land Information System for Lafarge and continues to work closely with Lafarge to provide annual services such as: application enhancements and upgrades; new functionality development and business process analysis; data conversion and uploads; hardware maintenance, warranty management, troubleshooting; daily back-ups with off-site storage; monthly delivery of datasets and reports; database management (integrity checks, etc.); system deployment and development; maintenance of all service packs and system upgrades; and email management.

The Results

Working in tandem with Lafarge, ENKON has enhanced the LIS solution by adding powerful functionality that aids in access and analysis of information and allows its employees to be more efficient. Since its initial deployment in North America, the Lafarge LIS is now used in over 10 countries with a user base of over 800 users. The ENKON designed and built Lafarge LIS sends out and tracks over 600 land management-related task emails every week.
